Advanced Blade-free technology	yes	rare
Great price	yes	??
Surgeon has 17 years of LASIK experience	yes	rare
Advanced knowledge of Laser equipment	yes	no

"I originally helped develop LASIK technology as an electrical engineer in the late 1980's. I became fascinated with the possibilities and wanted to experience it first hand to help patients so I went back to school and became an MD. The first LASIK procedure I performed was in 1996. Since then, I have completed over 25,000 procedures and every person has experienced an improvement in vision. With today's technology, we can even help people who weren't candidates for LASIK just a few years ago. My staff and I take a genuine interest in each patient and we will only recommend LASIK if it's the right procedure for you. We don't suggest higher priced procedures unless necessary."

—Dr. Brian Davis, MD

You only have one set of eyes so when it comes to LASIK you should demand the best. Most people are looking for the best technology and a doctor with years of experience with a great track record. At Davis Vision you will find what you are looking for.

Only the first 20 patients in October will get this offer so call today to schedule your
